

User Manual

This guide will take you through all the page of our application and explain how to use it.

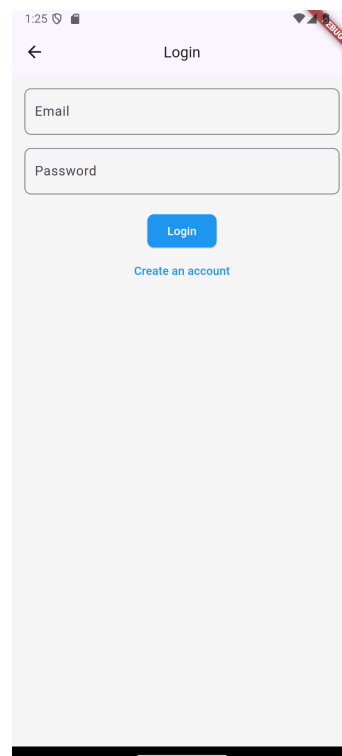

Welcome page

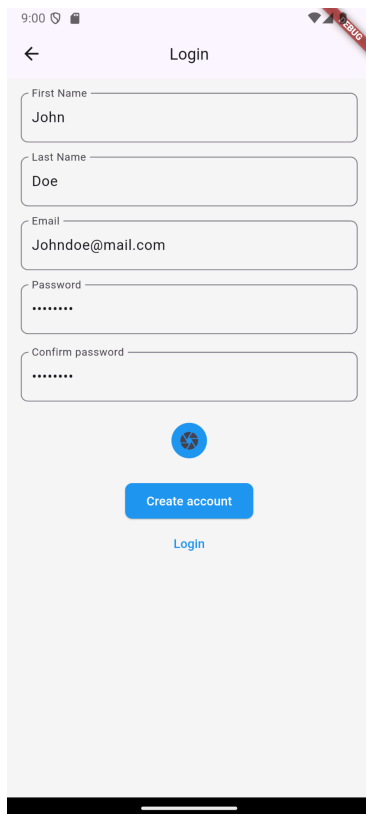

This is the page your app will open on. From here, two options open to you. The first is the “Go to login!” button, allowing you to access the login page, and the second is the “Get your itinerary!” button, allowing you to access the face scan page.

Login

The login page allows you to login with your email and password or, if you do not have an account already, to create one through the “Create an account” link.

Register

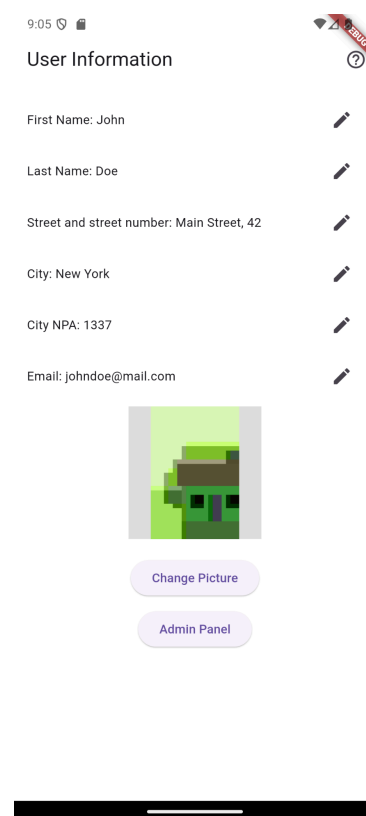

A mobile app registration screen with a light purple header containing a back arrow and the word "Login". The screen features five input fields: "First Name" (filled with "John"), "Last Name" (filled with "Doe"), "Email" (filled with "Johndoe@mail.com"), "Password" (filled with seven dots), and "Confirm password" (filled with seven dots). Below the fields is a blue camera icon and a blue "Create account" button. At the bottom is a blue "Login" link. The status bar at the top shows the time 9:00 and various icons.

This page allows you to create your account and all fields are required. Some fields demand correct input, such as email, password and city. A picture is also required for the account to be created. On successful creation, you will be taken to the user information page.

User Info Page

This page allows you to see your current informations, as well as to change them should you want/need to. To do so, simply tap on the pen on the side of the field you wish to change. You may also change the picture through the “Change picture” button. On the top right of the screen, you will find a question mark leading you to the about page, as well as the disconnect button leading you back to the welcome screen. Please note that the application will not keep you connected should you close it.

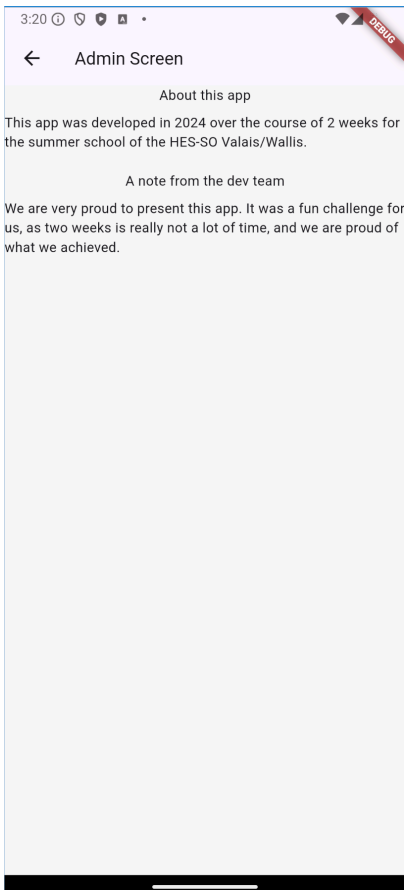

If your account is flagged as an admin, an “Admin panel” button will appear at the bottom of the page. It will allow you to acces the admin page.

A mobile app user information page with a light purple header containing the time 9:05, status icons, and a question mark icon. The title "User Information" is in the center. Below it is a list of user details, each with a pencil icon for editing: "First Name: John", "Last Name: Doe", "Street and street number: Main Street, 42", "City: New York", "City NPA: 1337", and "Email: johndoe@mail.com". Below the list is a square profile picture of a green and brown pixelated character. At the bottom are two buttons: "Change Picture" and "Admin Panel". The status bar at the top shows the time 9:05 and various icons.

About page

This page contains informations about the developers and the app.

Admin page

The admin page allows you to see all existing users of the app.

Face Scan

This page is the one allowing you access to your itinerary. There are two options to do so.

Firstly, you may use the blue button at the bottom of the page to take a picture of yourself. Should the system recognize you, you will be taken to the itinerary page.

Otherwise, you may tap the live button on the top right corner of the screen. This will remove the picture button and allow for realtime recognition of the user. In this mode, you will be taken to the itinerary page as soon as you are recognized.

In both cases, you need to be alone on the picture, or an error message will appear. Should you be unrecognized, a message will indicate so in both modes.

Itinerary

This page is dedicated to the travel infos you will need to get back to your registered home.

On top of the page, you will see a message welcoming you, and underneath it a weather indication.

This indication is the realtime weather at your destination at the time of your itinerary page opening.

Under this, you will see cards containing different trips options.

These trips go from your current location to your registered home, and will indicate every step of the journey to get there.

The first and last legs are always the time it takes to get to and from the station of the preceding/following leg.
